

Recently I have made a little poster with English and Spanish phone numbers and website for info on A.A. I have created an introduction letter, for employers using migrant workers. They often use foreign workers in seasonal work. Asking employers to post this for us.

I visited a couple of companies already, and plan to start calling others that are farther away to ask if they are interested. I could then mailpost plus info to them. I would be too costly to deliver personally to some at greater distance from me.

Other than that our Makovik mtg. is still going. Sounds like our Inter area remote community forum may happen again this year in Dec..

I would like to suggest that a heading be added on the Area 82 website to be for remote communities. It could link a page to offer a description and other info. I would ask webmaster if this is possible?

I would like to announce that a meeting will be set up on-line in the near future for the purpose of having people who are genuinely interested in getting involved with promotion of Remote Community awareness and activity.

Thank you Paul W. R.C. chair area 82
